SUMMARY

- Aspiring Software Engineer and Full Stack Developer skilled in Java, JavaScript, React.js, Node.js, Express.js, and MongoDB. Built and deployed multiple real-world applications with features such as authentication, role-based access control, cloud storage integration, and RESTful APIs. Experienced in leading project development and collaborating with teams to deliver scalable solutions. Seeking opportunities to leverage technical skills and problem-solving abilities in software development.

EDUCATION

Noida Institute of Engineering and Technology

Bachelor of Technology in Information Technology

Greater Noida, U.P

2022 – 2026

Ugan Triveni College

Intermediate

Begusarai, Bihar

2021

Jagriti Public School

High School

Samastipur, Bihar

2019

TECHNICAL SKILLS

- Languages:** Java, SQL
- Web Development:** HTML, CSS, JavaScript
- Technologies:** MongoDB, REST API
- Frameworks:** React.js, Node.js, Express.js
- Developer Tools:** Git, GitHub, VS Code, Postman
- Concepts:** OOPs, DBMS, Data Structures and Algorithms(Array)
- Libraries & Utilities:** Axios, Fetch API, dotenv

EXPERIENCE

Freelance Full Stack Developer | CNC Test Series Platform — React.js, Node.js, Express.js, MongoDB, JWT | [Live Link](#)

- Developed a full-stack EdTech platform for CA students with modules for Foundation, Inter, and Final exam preparation.
- Implemented secure authentication, authorization, and RESTful APIs using JWT and Express.js.
- Built responsive user interfaces and integrated mock tests, PDF resources, and user management features.
- Managed the complete development lifecycle from client requirement gathering to deployment on Render.

PROJECTS

UrbanNivas – Rental Listing Platform | Node.js, Express.js, MongoDB, Passport.js, Cloudinary | [Live Link](#)

- Developed a full-stack rental listing platform enabling users to add, edit, and delete property listings with secure authentication.
- Implemented admin role-based access allowing approval and moderation of listings.
- Integrated Cloudinary with Multer for optimized image uploads and storage.
- Added review functionality to improve user engagement and listing credibility.

Multi-Model Road Damage Detection | Node.js, Express.js, MongoDB, OpenCV | [Live Link](#)

- Developed an ML-based system to detect road damage such as potholes using multiple detection models.
- Integrated backend APIs to process image inputs and return detection results efficiently.
- Improved detection accuracy by combining multiple models for better overall performance.
- Designed for real-world applications in smart infrastructure monitoring and city maintenance.

LEADERSHIP

- Directed a team of 3 members on the major Project.
- Supervised project development and coordination to ensure seamless teamwork and continuous progress.

CERTIFICATIONS

- Python Basics from University of Michigan – Coursera
- Object Oriented Programming in Java from University of California San Diego – Coursera
- ReactJS from Infosys Springboard
- Database Management System – Science Graduates Infosys Springboard
